## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 10/15/2004 has been considered by the examiner.

### ***Drawings***

2. The drawings were received on 10/15/2004. These drawings are accepted by the examiner.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sano (6,927,016) in view of Kodama (EP 1406122).

Sano discloses a blank disc and stamper manufacturing method. The stamper is formed comprising two layers of photoresist which appear to meet the structural limitations of the instant claims. The resists may comprise a crosslinking agent, but no specific agent is discussed.

Kodama discloses a photoresist comprising a conventional crosslinking agent which is a melamine having the structure of the instant claims.

Given the teachings of the references, it would have been obvious to one of ordinary skill in the art to prepare the material of Sano employing the conventional crosslinking agent of

Kodama with reasonable expectation of achieving a direct stamper capable of preventing resist bumps.

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Katsumura et al (6,849,390), Teng et al (6,793,780), Tacke (6,238,846), Kawai (6,846,174), and Nishiyama et al (6,874,262) are cited for their teachings of similar materials.
